

HANDLS is studying the social, psychological, and financial effects of COVID-19. We are using this questionnaire to study how HANDLS participants are affected by the pandemic. During your phone call, a HANDLS staff member will ask you these questions. Your interviewer will record your answers. If you prefer, you may fill in the questionnaire before the phone call. Sometimes participants find it helpful to look at the questions on a piece of paper while they follow along during the phone call. Your interviewer will record your answers during the call. Your interviewer may skip some questions during your phone call if the questions do not apply to you. This survey will take about 20-25 minutes. Thank you for your participation!
